WORK EXPERIENCE

Softman InfoSolutions Pvt. Ltd.

(09/2024 - 03/2025)

SDE 1

- Designed and implemented 20+ core pages for HMS, improving the experience of 1,000+ monthly users.
- Built a dynamic **dashboard** to display real-time hospital metrics (patients, revenue, etc.) via API integrations.
- Led the development of **Patient Registration** and **Billing Modules**, supporting ~100 entries/day and improving billing accuracy by 25%.
- Developed the **Case Sheet Page** for recording patient symptoms/diagnosis and automated prescription generation.
- Integrated **PDF and Excel export functionality** using DevExtreme, reducing manual work by 70%.
- Created ``whatswebs.js``, a Node.js-based library for WhatsApp Web automation used in a live client project.
- Done the first set of code reviews, fixed bugs, improved existing features, implemented new features, worked on manual testing, etc.

Softman InfoSolutions Pvt. Ltd.

(03/2024 - 09/2024)

SDE Intern

- Contributed to the development of the Hospital Management System (HMS) web application using **React.js** and **DevExtreme** components.
- Developed secure authentication features including **Signup**, **Login**, and **Reset Password** with proper form validation and session handling.
- Created reusable UI components and implemented responsive designs for better user experience.
- Assisted in building the **User Master Module**, enabling CRUD operations with role-based access for various user types (Doctors, Receptionists, etc.).
- Participated in backend development using **Node.js**, **Express.js**, and **MySQL**, contributing to RESTful API development and integration.
- Worked on optimizing SQL queries and enhancing API response time contributing to a 30% improvement in form load.
- Resolved bugs, enhanced existing features, developed new functionalities, and conducted manual testing to ensure system reliability.
